2. Install/uninstall	1
3. Operating instructions / administration	1
4. The user side	1
5. Blocks	2
6. Templates	2
7. Module credits	2

1. Function

“Contact Us” is a very simple module. It provides a Main Menu link to a contact form that visitors can use to email the website Administrator.

2. Install/uninstall

No special measures necessary, follow the standard installation process – extract the “contact” folder into the `../modules` directory. Install the module through **Admin -> System Module -> Modules**. Detailed instructions on installing modules are available in the **XOOPS Operations Manual**

3. Operating instructions / administration

There is no administration menu for this module. The only item that can be configured is the destination of emails generated by the “Contact Us” form. This is the ‘Admin mail address’ for the website as set in **Administration -> System -> Preferences -> General Preferences**.

4. The user side

Users access the Contact Us form via a link in the main menu. They simply type their message into the “comments” section of the form and press the “submit” button to post it. If they are logged in the form will automatically be filled in with the contact details listed in their profile (anonymous users must enter their details manually).

Contact Us Form	
Name	<input type="text" value="crushdepth"/>
Email	<input type="text" value="simon@crushdepth.net"/>
URL	<input type="text" value="http://localhost/chinese/"/>
ICQ	<input type="text"/>
Company	<input type="text"/>
Location	<input type="text"/>
Comments	<input type="text"/>
<input type="button" value="Submit"/>	

5. Blocks

There are no blocks for this module.

6. Templates

There is only one template available for this module, `contact_contactusform.html` which displays the "Contact Us" form. The template may be edited through **Admin -> System -> Templates -> Contact Us**.

7. Module credits

The Contact Us module was written by Kazumi Ono, aka "Onokazu".
